

Training on Infrared Spectroscopy and Chemometrics

The Quality Department of Agricultural Products of the CRA-W hosted, from the 25 till the 29 February 2008, a training on Infrared Spectroscopy and Chemometrics. The aim of this training was to give a complete overview of the theoretical and practical part of the spectroscopic and chemometric methods used at the CRA-W.

Seven participants coming from different countries (France, Germany, Czech Republic and Belgium) and different working research areas (pharmacy, agriculture, chemistry, instrumentation) have been participated at the training.

This training has been done by:

Pierre DARDENNE (CRA-W) – NIR spectroscopy

Bernard LECLER (CRA-W) – NIR network

André KOK (Brucker Optics) - Instrumentation

Ouissam ABBAS (CRA-W) – MIR spectroscopy

Vincent BAETEN (CRA-W) – Raman spectroscopy – NIR microscopy

Juan Antonio FERNANDEZ (CRA-W) – Chemometrics – NIR imaging

George SINNAEVE (CRA-W) – New trends in spectroscopy – Embedded NIR

See you in one year for a next training session.
